1 Articles acceptés ou parus dans des revues avec comité d’arbitrage

1. S. Afšar, L. Brotcorne, P. Marcotte and G. Savard
   “Revenue optimization in energy networks involving self-scheduled demand and a smart grid”

2. M. Zimmermann, E. Frejinger and P. Marcotte
   “A strategic Markovian traffic equilibrium model for capacitated networks”
   *Transportation Science* 5 (2021) 574–591

3. T. Dan, A. Lodi and P. Marcotte
   “An exact algorithmic framework for a class of mixed-integer programs with equilibrium constraints”
   *SIAM Journal on Optimization* 31 (2021) 275–306

4. T. Dan, A. Lodi and P. Marcotte
   “Joint location and pricing within a user-optimized environment”
   *EURO Journal on Computational Optimization* 8 (2020) 61–84

5. T. Dan and P. Marcotte
   “Competitive facility location with selfish users and queues”

6. A. Kamgaing Kuiteing, P. Marcotte and G. Savard
   “Pricing and revenue maximization over a multicommodity transportation network: the nonlinear demand case”
   *Computational Optimization and Applications* 71 (2018) 641–671

7. M. Carvalho, A. Lodi and P. Marcotte
   “A polynomial algorithm for a continuous bilevel knapsack problem”

8. M. Hosseinalifam, P. Marcotte and G. Savard
   “A new bid price approach to dynamic resource allocation in network revenue management”

   “Network pricing of congestion-free networks: the elastic and linear demand case”
   *Transportation Science* 51 (2017) 791–806

10. S. Afšar, L. Brotcorne, P. Marcotte and G. Savard
    “Achieving an optimal trade-off between revenue and energy peak within a smart grid environment”
    *Renewable Energy* 91 (2016) 293–301

11. M. Hosseinalifam, G. Savard and P. Marcotte
    “Computing booking limits under a non-parametric demand model: A mathematical programming approach”

12. F. Gilbert, M. Anjos, P. Marcotte and G. Savard
    “Optimal design of bilateral contracts for energy procurement”

13. M. Hosseinalifam, P. Marcotte and G. Savard
    “Network capacity control under a nonparametric demand choice model”
   “Quantifying the social welfare loss in moral hazard models”

15. S. Sharif Azadeh, P. Marcotte and G. Savard
   “A Non-Parametric Approach to Demand Forecasting in Revenue Management”

16. F. Gilbert, P. Marcotte and G. Savard
   “A numerical study of the logit network pricing problem”
   Transportation Science 43 (2015) 706–719

17. S. Sharif Azadeh, P. Marcotte and G. Savard
   “A taxonomy of demand uncensoring methods in revenue management”

18. J. Guérin, P. Marcotte and G. Savard
   “$L^p$ Approximation of Univariate Concave Functions”
   JOTA 161 (2014) 490–505

19. F. Gilbert, P. Marcotte and G. Savard
   “Logit network pricing”

20. F. Gilbert, P. Marcotte and G. Savard
   “Mixed-logit network pricing”
   Computational Optimization and Applications 57 (2014) 105–127

   “Two-stage stochastic bilevel programming over a transportation network”
   Transportation Research B 58 (2013) 92–105

22. P. Marcotte, G. Savard and A. Schoeb
   “A hybrid approach to the solution of a pricing model with continuous demand segmentation”
   EURO Journal on Computational Optimization 1 (2013) 117–142

23. C.O. Pieume, P. Marcotte, L.P. Fotso and P. Siarry
   “Generating Efficient Solutions in Bilevel Multi-Objective Programming Problems”

24. L. Brotcorne, F. Cirinei, P. Marcotte and G. Savard
   “A Tabu search algorithm for the network pricing problem”

25. L. Brotcorne, F. Cirinei, P. Marcotte and G. Savard
   “An Exact Algorithm for the Network Pricing Problem”
   Discrete Optimization 8 (2011) 246–258

   “Solving Bilevel Linear Multiobjective Programming Problems”

   Discrete Optimization 8 (2011) 246–258

   “A Polyhedral Study of the Network Pricing Problem with Connected Toll Arcs”

29. Y. Zhang, O. Berman, P. Marcotte and V. Verter
   “A Bilevel Model for Preventive Healthcare Facility Network Design with Congestion”
   IIE Transactions 42 (2010) 865–880
30. G. Heilporn, P. Marcotte and G. Savard
  “A Parallel Between Two Classes of Pricing Problems in Transportation and Economics”

31. P. Marcotte, A. Mercier, G. Savard and V. Verter
  *Transportation Science* 43 (2009) 228–243

32. P. Marcotte and D.L. Zhu
  “Existence and computation of optimal tolls in multiclass network equilibrium problems”

33. P. Marcotte, G. Savard and D.L. Zhu
  “Mathematical structure of a bilevel strategic pricing model”

34. L. Brotcorne, M. Labbé, P. Marcotte and G. Savard
  “Joint Design and Pricing on a Network”

35. L. Brotcorne, G. Savard and P. Marcotte
  “Bilevel Programming: The Montreal School”
  *INFOR* 46 (2008) 231–246

36. S. Dewez, M. Labbé, P. Marcotte and G. Savard
  “New formulations and valid inequalities for a bilevel pricing problem”

37. B. Colson, P. Marcotte and G. Savard
  “An overview of bilevel optimization”

38. P. Marcotte and G. Savard
  “A Bilevel Approach to Optimal Pricing”

39. J. Guérin, P. Marcotte and G. Savard
  “An optimal adaptive algorithm for the approximation of concave functions”

40. J.-P. Dussault, P. Marcotte, S. Roch and G. Savard
  “A smoothing heuristic for a class of bilinear bilevel programs”

41. S. Roch, G. Savard and P. Marcotte
  “An approximation algorithm for Stackelberg network pricing”
  *Networks* 46 (2005) 57–67

42. B. Colson, P. Marcotte and G. Savard
  “A trust-region method for nonlinear bilevel programming: algorithm and computational experience”
  *Computational Optimization and Applications* 30 (2005) 211–227

43. B. Colson, P. Marcotte and G. Savard
  “Bilevel programming: A survey”
  *OR* 3 (2005) 87–107

44. P. Marcotte, S. Nguyen and A. Schoeb
  “A strategic model of traffic assignment in static capacitated networks”

45. P. Marcotte and L. Wynter
  “A new look at the multi-class network equilibrium problem”
46. P. Marcotte, G. Savard and F. Semet
   “A bilevel programming approach to the travelling salesman problem”

47. Y. Hamdouch, P. Marcotte and S. Nguyen
   “Capacitated transit assignment with loading priorities”

48. Y. Hamdouch, P. Marcotte and S. Nguyen
   “A strategic model for dynamic traffic assignment”

49. J.-P. Côté, P. Marcotte and G. Savard
   “A bilevel modeling approach to pricing and fare optimization in the airline industry”

50. P. Marcotte and D. Zhu
   “A cutting plane for quasimonotone variational inequalities”

51. L. Brotcorne, M. Labbé, P. Marcotte and G. Savard
   “A bilevel model and algorithm for a freight tariff setting problem”
   *Transportation Science* **35** (2001) 1–14

52. P. Marcotte, G. Savard and D. L. Zhu
   “A trust region algorithm for nonlinear bilevel programming”

53. S. Dubuc, I. Kagabo and P. Marcotte
   “Trivial cases for the Kantorovitch problem”

54. P. Marcotte and D. L. Zhu
   “On the existence of solutions to the dynamic user equilibrium problem”

55. L. Brotcorne, M. Labbé, P. Marcotte and G. Savard
   “A bilevel model and algorithm for a freight tariff setting problem”

56. J.-P. Crouzeix, P. Marcotte and Daoli Zhu
   “Conditions ensuring the applicability of cutting-plane methods for solving monotone variational inequalities”

57. Y.W. Xu, J.H., Wu, M. Florian and P. Marcotte
   “Advances in the continuous dynamic network loading problem”

58. S. Dubuc, I. Kagabo and P. Marcotte
   “A note on the uniqueness of solutions to the transportation problem”
   *INFOR* **37** (1999) 141–148

59. P. Marcotte and D. L. Zhu
   “Weak sharp solution of variational inequalities”

60. S.Q. Wu, Y. Chen and P. Marcotte
   “A cutting plane method for linear bilevel programs”

61. P. Marcotte and D. L. Zhu
   “Convergence properties of feasible descent algorithms for solving variational inequalities in Banach spaces”
62. M. Labbé, P. Marcotte and G. Savard
“A bilevel model of taxation and its application to optimal highway pricing”

63. J.-L. Goffin, P. Marcotte and D. L. Zhu
“An analytic center cutting-plane method for pseudomonotone variational inequalities”

64. R. Séguin, J.-Y. Potvin, M. Gendreau, T. G. Crainic, and P. Marcotte
“Real-time decision problems: An operational research perspective”

65. P. Marcotte and S.Q. Wu
“Finding the strictly local and $\epsilon$-global minimizers of concave minimization with linear constraints”

66. P. Marcotte and D. L. Zhu
“Exact and inexact penalty methods for the generalized bilevel programming problem”

“Co-coercivity and its role in the convergence of iterative schemes for solving variational inequalities”

68. M. Gendreau, P. Marcotte and G. Savard
“A Hybrid tabu-ascent algorithm for the linear bilevel programming problem”

69. P. Marcotte and D. L. Zhu
“Global convergence of descent processes for solving non strictly monotone variational inequalities”

70. D. L. Zhu and P. Marcotte
“Coupling the auxiliary problem principle with descent methods of pseudoconvex programming”

71. P. Marcotte and G. Savard
“A new implicit enumeration scheme for the discriminant analysis problem”

72. M. Desrochers, P. Marcotte and M. Stan
“The congested facility location problem”

73. P. Marcotte and J. H. Wu
“On the convergence of projection methods: Application to the decomposition of affine variational inequalities”

74. D. L. Zhu and P. Marcotte
“New classes of generalized monotonicity”

75. J. H. Wu, M. Florian and P. Marcotte
“Transit equilibrium assignment: A model and solution algorithms”

76. D. L. Zhu and P. Marcotte
“An extended descent framework for monotone variational inequalities”
*JOTA* **80** (1994) 353–369
77. J.E. Fernández, P. Marcotte, S. Mondschein, J. Vera and A. Weintraub
“Solution approaches to the bus operator problem”
Transportation Research B 27B (1993) 1–12

78. P. Marcotte and D. L. Zhu
“Modified descent methods for solving monotone variational inequalities”

79. J. H. Wu, M. Florian and P. Marcotte
“A general descent framework for the monotone variational inequality problem”
Mathematical Programming A 61 (1993) 281–300

80. P. Marcotte and G. Marquis
“Efficient implementation of heuristics for the continuous network design problem”

81. P. Marcotte, L. Zubieta and G. Marquis
“A Newton-SOR method for solving the spatial price equilibrium problem”
Transportation Science 26 (1992) 36–47

82. E. Fernández and P. Marcotte
“Operators-Users Equilibrium Model in a Partially Regulated Transit System”
Transportation Science 26 (1992) 93–105

83. P. Marcotte and Gilles Savard
“Novel approaches to the discrimination problem”

84. P. Marcotte
“Application of Khobotov’s algorithm to variational inequalities and network equilibrium problems”
INFOR 29 (1991) 258–270

85. P. Marcotte and G. Savard
“A note on the Pareto-optimality of solutions to the linear bilevel programming problem”

86. P. Marcotte, O. Drissi-Kaïtouni and L. Zubieta
“Iterative methods for solving an equilibrium problem arising in transit deregulation”
Transportation Research B 24B (1990) 45–55

87. P. Marcotte
“To serve or not to serve: A badminton dilemma”
SIAM Review 31 (1989) 303–305

88. P. Marcotte and J.-P. Dussault
“A sequential linear programming algorithm for solving monotone variational inequalities”
SIAM Journal on Control and Optimization 27 (1989) 1260–1278

89. J.-P. Dussault and P. Marcotte
“Conditions de régularité géométrique pour les inéquations variationalles”
R.A.I.R.O. Recherche Opérationnelle 23 (1989) 1–16

90. P. Marcotte
“A note on a bilevel programming algorithm by LeBlanc and Boyce”

91. P. Marcotte and J. Guelat
“Adaptation of a modified Newton method for solving the asymmetric traffic equilibrium problem”
Transportation Science 22 (1988) 112–124

92. P. Marcotte
“Un algorithme général de calcul de l’état d’équilibre d’un oligopole”
93. P. Marcotte
  “Algorithms for the network oligopoly problem”

94. P. Marcotte and J.-P. Dussault
  “A note on a globally convergent Newton method for solving monotone variational inequalities”

95. P. Marcotte
  “A note on Khilnani and Tse USA algorithm”

96. A. Haurie and P. Marcotte
  “A game theoretic approach to network equilibrium”
  Mathematical Programming Study 26 (1986) 252–255

97. P. Marcotte
  “Network design problem with congestion effects: A case of bilevel programming”
  Mathematical Programming 34 (1986) 142–162

98. J. Guélat and P. Marcotte
  “Some comments on Wolfe’s “Away Step””
  Mathematical Programming 35 (1986) 110–119

99. P. Marcotte
  “A new algorithm for solving variational inequalities, with application to the traffic assignment problem”
  Mathematical Programming 33 (1985) 339–351

100. A. Haurie and P. Marcotte
  “On the relationship between Nash-Cournot and Wardrop equilibria”
  NETWORKS 15 (1985) 295–308

101. P. Marcotte
  “Quelques notes et résultats nouveaux sur le problème d’équilibre d’un oligopole”

102. P. Marcotte
  “Network optimization with continuous control parameters”
  Transportation Science 17 (1983) 181–197

2 Actes de conférences avec comité d’arbitrage

1. Y. Bengio, N. Le Roux, P. Vincent, O. Delalleau and P. Marcotte
  “Convex Neural Networks”

2. M. Fortin, P. Marcotte and G. Savard
  “Pricing a segmented market subject to congestion”
  Proceedings of TRISTAN V (Triennial Symposium on Transportation Analysis) Le Gosier, Guadeloupe, July 13–18 2004

  “A bilevel model for a network design and tariff setting problem”
  Proceedings of TRISTAN V (Triennial Symposium on Transportation Analysis) Le Gosier, Guadeloupe, July 13–18 2004

4. P. Marcotte, S. Nguyen and K. Tanguay
  “Implementation of an efficient algorithm for the multiclass traffic assignment problem”
3 Chapitres de livre

1. M. Labbé et P. Marcotte
   “Bilevel Network Design”
   Network Design with Applications to Transportation and Logistics, T. G. Crainic, M. Gendreau

2. P. Marcotte, A. Mercier, G. Savard et V. Verter
   “Gestion du risque lié au transport des matières dangereuses : une approche basé sur la tarification”
   Stratégies logistiques et matières dangereuses, N. de Marcellis-Warin, M. Trépanier et I. Peignier

3. P. Marcotte and M. Patriksson
   “Traffic Equilibrium”
   Transportation. Handbooks in Operations Research and Management Science, C. Barnhardt and

   “Path-based Formulations of a Bilevel Toll Setting Problem”
   Optimization with Multivalued Mappings Theory : Theory, Applications and Algorithms, S. Dempe

5. P. Marcotte and G. Savard
   “Bilevel Programming : A combinatorial perspective”
   Essays and Surveys in Global Optimization, D. Avis, A. Hertz and O. Marcotte, eds., Springer
   (2005) 191–217

6. P. Marcotte and G. Savard
   “A bilevel programming approach to Price Setting”
   Decision and Control in Management Science. Essays in Honor of Alain Haurie, Georges Zaccour

7. P. Marcotte and G. Savard
   “Bilevel Programming : Formulation”, “Bilevel Programming : Applications” and “Bilevel Pro-
   gramming : Algorithms”

8. M. Labbé, P. Marcotte and G. Savard
   “On a class of bilevel programs”

9. P. Marcotte
   “Reformulations of a bicriterion equilibrium problem”
   Reformulation - Nonsmooth, Piecewise Smooth, Semismooth and Smoothing Methods, M. Fukushima

10. P. Marcotte and S. Nguyen
    “Hyperpath formulations of traffic assignment problems”
    Equilibrium and Advanced Transportation Modelling, P. Marcotte and S. Nguyen eds., Kluwer
    (1998) 175–200
11. P. Marcotte and D. L. Zhu
   “Equilibria with infinitely many differentiated classes of customers”
   Complementarity and variational problems. State of the art, J-S Pang and M. Ferris eds., SIAM
   (1997) 234–258

12. P. Marcotte
   “Advantages and drawbacks of variational inequality formulations”
   Variational Inequalities and Network Equilibrium Problems, F. Giannessi and A. Maugeri eds.,

13. P. Marcotte and M. Blain
   “[A Stackelberg-Nash model for the design of deregulated transit system”

4 Livres

1. P. Marcotte et A. Poirier
   25 circuits autour de Montréal
   Éditions Vélo Mag (2014)

2. A. Poirier et P. Marcotte
   15 circuits autour de Montréal (version révisée)
   Éditions Vélo Mag (2011)

3. A. Poirier et P. Marcotte
   15 circuits autour de Montréal
   Éditions Vélo Mag (2009)

   Transportation and Network Analysis : Current Trends. Miscellanea in honor of Michael Florian

5. P. Marcotte and S. Nguyen, eds.
   Equilibrium and Advanced Transportation Modelling
   Kluwer (1998)

5 Autres

1. P. Marcotte et F. Soumis
   "Tous les chemins mènent aux maths"
   Québec Science (2000)

2. P. Marcotte
   Design optimal d’un réseau de transport en présence d’effets de congestion
   Thèse de doctorat (Ph.D.), Université de Montréal (1981)

3. P. Marcotte
   Application de la transformée de Laplace l’interpolation par des sommes d’exponentielles
   Mmoire de maîtrise (M.Sc.), Université de Montréal (1975)

mise à jour : 26 août 2021
